

## IT'S THIS EASY TO SORT FOOD WASTE

You just need paper bags and a container. Place the container under your kitchen sink. You'll be given new paper bags by your landlord.

1. Unfold the paper bag and press it down so it fits the container well.
2. Allow wet food waste to drain first before you put it into the paper bag.
3. Roll up the paper bag at the top to close it.
4. Put the paper bag into the brown waste bin when it's full.

You can put the following things in the paper bag for food waste:

- Fruit and vegetable peel, egg shells
- Bread
- Meat and fish
- Dairy products
- Sweets
- Coffee and tea filters
- Wilted flowers
- Paper towels and serviettes

Don't put anything apart from food waste into the paper bag or the brown waste bin. Plastic and other ordinary rubbish will spoil the recycling process.
